

# Ashika Dandeniya

## Software Engineer

my studies involve learning the principles of computing, including algorithms, programming languages, and software development. My training combines theoretical concepts with hands-on projects to build practical skills. I explore various areas like machine learning, cybersecurity, and software engineering. Staying updated with industry trends through internships, conferences, and competitions is crucial for my education. Overall, my education equips me to solve complex problems, innovate in technology, and contribute to advancements in the field.
